DIANNA SHARP, BS | DATA MANAGEMENT ASSOCIATE | BIO

Dianna comes to us from Eli Lilly and Company and has been a Clinical Data Manager for 15 years. She spent 8 of those beginning years in Oncology Data Management, however, took a pause when her son-in-law was diagnosed with Hodgkin’s Disease in 2003 at the young age of 23. “They had only been married a year and cancer was now in our lives. Oncology became too personal for me and I asked to be transferred to Neuroscience Research.” Her son-in-law has been cancer free for six years now and has become her strength and courage to return to Oncology Research.

As a Data Manager, Dianna has enjoyed the privilege of working in Oncology, Neuroscience, and Osteoporosis research, along with training many study coordinators and colleagues around the world. She especially enjoys the opportunity to work with all the diverse talent in cancer research. She looks forward to the Hoosier Oncology Group’s dedication of striving to increase cancer patient participation in clinical trials, as she believes it is only through patient participation that these clinical advances will be made that will allow us to make strides and put cancer to rest, permanently. (Currently, only 5% of cancer patients participate in clinical trials.)

Dianna lives in Greenwood with her husband of 20 years, her 21 year old daughter and her 19 year-old son. Her older children, son 33, daughter 32 are close by and she wouldn’t have it any other way.
