

Hoosier Oncology Group

DOUG SMIDEBUSH | DATA SYSTEMS DIRECTOR | BIO

Doug has been a member of the Hoosier Oncology Group since May 2003. He started in early days of electronic data capture at the HOG and has been the primary resource for EDC. His has over 10 years experience in EDC, data warehousing, and software development.

In his time at the Hoosier Oncology Group, Doug has developed the process for electronic case report form creation, built global standards for data collection, created SOPs for data collection and management, and supplied reporting support and training. His mantra is, "Good answers start with good data!"

Doug holds a BS in Management from Purdue University with an emphasis on Management Information Systems. He met his wife, Jennifer, at Purdue. After college they lost touch, but ended up living a block away from each other in Chicago. They have been married for 8 years and have a 2-year old daughter, Alice. Doug is very proud that Alice knows all the major characters from Star Wars, even though she has not seen the movie yet.
